ERP FOR ROLLER FLOUR MILLS

Unleashing the Power of ERP across Your Organization

Procurement and Supply Chain Management:

Streamlining procurement processes, supplier management, purchase order generation, and inventory replenishment.

Inventory Management:

Robust inventory control for tracking raw materials, including grains and additives, managing stock levels, and generating usage reports.

Production Planning and Control:

Efficient scheduling based on demand forecasts, optimizing resources, and real-time monitoring of production progress.

Quality Control:

Modules for capturing quality data at various stages, conducting tests, inspections, and generating quality reports.

Sales and Distribution Management:

Order processing, sales tracking, delivery scheduling, invoicing, and integration with other systems.

Financial Management:

Accounting, budgeting, and financial reporting capabilities for tracking costs, managing accounts, and generating statements.

Human Resource Management:

Streamlining HR processes, employee management, and talent acquisition.

Maintenance and Repair Management:

Streamlining maintenance processes, equipment management, and repair activities.

Reporting and Analytics:

Customizable reports, KPI analysis, and insights for informed decision-making and monitoring performance.

PROCUREMENT MANAGEMENT

● Supplier Management

- Centralized database of suppliers
- Contact information and performance metrics
- Evaluation and selection based on quality, pricing, and delivery capabilities

● Purchase Requisition

- Electronic creation and management
- Elimination of manual paperwork
- Accurate and timely submission of purchase requests
- Simplified approval workflow

● Purchase Order Generation

- Automation of creation and management
- Populating required information
- Supplier details, item specifications, quantities, and delivery dates
- Reducing errors and ensuring consistency

● Inventory Integration

- Seamless integration with inventory management system
- Maintaining optimal inventory levels
- Triggering purchase orders based on reorder points or forecasted demand
- Avoiding stock-outs or excess inventory

● Vendor Performance Evaluation

- Tracking and analysis of supplier performance
- On-time delivery, quality, and responsiveness
- Evaluating vendor performance and making informed decisions

● Purchase Order Tracking

- Real-time visibility into purchase order status
- Tracking progress from creation to delivery
- Better coordination with suppliers
- Proactive management of delays or issues

● Invoice Matching

- Matching purchase orders, goods receipt, and supplier invoices
- Verifying received goods and services against the order
- Ensuring accurate and timely payments
- Reducing discrepancies and potential fraud

● Cost Control and Analysis

- Insights into purchase history, costs, and expenditure patterns
- Analysis of spending and identification of cost-saving opportunities
- Negotiating better pricing with suppliers
- Optimization of procurement strategies

● Compliance and Documentation

- Maintenance of procurement process documentation
- Contracts, terms and conditions, and compliance requirements
- Ensuring transparency and regulatory compliance
- Supporting audits and legal requirements

INVENTORY MANAGEMENT

Inventory Tracking

- Real-time monitoring of inventory levels
- Visibility into stock quantities, locations, and movements

Demand Planning and Forecasting

- Forecasting inventory
- Requirements based on historical data and sales trends
- Proactive inventory management to meet customer demands

Reorder Point and Stock Alerts

- Setting reorder points & automatic stock alerts
- Timely replenishment and avoidance of stockouts

Lot and Batch Tracking

- Tracking perishable or batch-controlled ingredients
- Capturing supplier, production batch, and quality control information

Inventory Valuation

- Supporting FIFO and weighted average cost methods
- Accurate valuation of inventory items

Inventory Optimization

- Analyzing demand patterns, lead times, and supplier performance
- Identifying slow-moving
- inventory and implementing just-in-time practices

Stock Transfers and Inter-Location Movements

- Facilitating stock transfers between multiple locations or warehouses
- Maintaining accurate stock levels across different locations

Inventory Reporting and Analysis

- Comprehensive inventory reports and analysis
- Insights into inventory performance and optimization opportunities

Integration with Procurement and Sales

- Seamless integration with procurement and sales modules
- Streamlined procurement processes and accurate inventory updates

PRODUCTION MANAGEMENT

Production Planning

Bill of Materials (BOM) Management

Capacity Planning

Return and Reverse Logistics

Analytics and Reporting

VENDOR AND BROKER MANAGEMENT

Vendor Management

- Maintaining a vendor database with contact information, payment terms, delivery terms, and performance history
- Selecting reliable vendors, negotiating contracts, and ensuring timely and quality supplies

Purchase Order Management

- Creating, tracking, and managing purchase orders
- Generating electronic purchase orders, communicating with vendors, and tracking order status
- Ensuring accurate order processing, reducing manual errors, and improving purchasing efficiency

Vendor Performance Evaluation

- Capturing data on delivery performance, supply quality, pricing, a responsiveness
- Measuring and analyzing vendor performance
- Identifying areas for improvement and making informed decisions on vendor selection and relationship management

Price and Contract Management

- Managing vendor pricing and contracts
- Maintaining negotiated prices, monitoring price changes, and tracking contract terms and conditions
- Ensuring accurate pricing, minimizing discrepancies, and improving contract compliance

Vendor Collaboration

- Facilitating collaboration and communication with vendors
- Providing vendor portals or communication channels for information exchange, order confirmations, and delivery schedule updates
- Enhancing transparency, reducing communication errors, and fostering better collaboration with vendors

Broker Management

- Managing brokers or intermediaries (if applicable)
- Maintaining broker information, tracking broker performance, and managing commissions or fees
- Optimizing broker relationships and ensuring effective coordination in procurement or sales processes

Payment and Invoice Management

- Managing vendor payments and invoices
- Automating invoice verification, matching with purchase orders, and initiating payment workflows
- Improving accuracy, reducing payment delays, and streamlining accounts payable processes

Vendor Relationship Analysis

- Providing analytics and reporting capabilities for vendor performance, purchasing patterns, and vendor spend
- Identifying opportunities for cost savings, negotiating better terms, and strategically managing vendor relationships

FINANCE AND ACCOUNTING MANAGEMENT

General Ledger

- Maintaining a centralized general ledger for accurate and up-to-date financial records
- Automating the recording of financial transactions, revenue, expenses, and asset management
- Ensuring data integrity and providing a comprehensive view of the organization's financial health

Accounts Payable

- Streamlining the accounts payable process through automation of invoice processing, payment approvals, and vendor management
- Facilitating timely payments, reducing manual errors, and improving cash flow management

Accounts Receivable

- Managing customer invoicing, payment collection, and receivables tracking
- Enabling timely and accurate billing, improving collections management, and enhancing cash flow visibility

Financial Reporting

- Generating financial statements, balance sheets, income statements, and cash flow statements
- Providing insights into financial performance, profitability, and key financial indicators
- Facilitating informed decision-making

Budgeting and Forecasting

- Supporting budgeting and forecasting processes, including budget creation, resource allocation, and performance monitoring
- Tracking expenses, identifying variances, and aligning financial goals with strategic objectives

Fixed Assets Management

- Tracking and managing fixed assets, including depreciation calculations, lifecycle management, and maintenance scheduling
- Ensuring accurate asset valuation, compliance with accounting standards, and efficient asset utilization

Financial Controls & Compliance

- Incorporating financial controls and compliance features, such as audit trails, segregation of duties, and regulatory compliance checks
- Ensuring adherence to financial regulations and internal control standards, reducing the risk of fraud or financial mismanagement

Cost Analysis

- Providing tools for cost analysis, expense evaluation, and identification of cost drivers
- Facilitating informed decisions to optimize costs, monitor profitability, and identify opportunities for cost reduction

HUMAN RESOURCE MANAGEMENT

COMPLIANCE AND REPORTING

EMPLOYEE ENGAGEMENT AND COMMUNICATION

MAINTENANCE AND REPAIR MANAGEMENT

➤ Comprehensive Asset Tracking

- Centralized repository of equipment and asset information
- Detailed maintenance history and documentation
- Enhanced visibility into equipment lifecycle and depreciation

➤ Cost Savings and Expense Control

- Lower repair and replacement costs
- Efficient utilization of equipments and resources
- Reduced emergency maintenance and associated expenses

➤ Preventive Maintenance

- Scheduled inspections, cleaning, and lubrication
- Calibration and adjustment of equipment components
- Early detection of potential issues to prevent breakdowns

➤ Planned Downtime and Shutdowns

- Strategic planning of equipment maintenance activities
- Coordinated shutdowns to minimize production disruptions
- Timely replacement of critical components or parts

➤ Compliance with Regulatory Standards

- Adherence to safety and environmental regulations
- Documentation of maintenance activities for audits
- Implementation of industry best practices

➤ Enhanced Equipment Documentation

- Accurate and up-to-date equipment records
- Maintenance history and documentation
- Easy retrieval of information for future reference

➤ Predictive Maintenance

- Utilization of condition monitoring techniques
- Analysis of equipment data for predictive insights
- Timely intervention to address emerging problems

➤ Safety and Risk Management

- Improved equipment safety and reliability
- Compliance with safety regulations and standards
- Minimized risk of accidents and injuries

➤ Extended Equipment Lifespan

- Proper maintenance and timely repairs
- Reduction in wear and tear of equipment
- Preservation of capital investments
