EDUCATIONAL PROJECTS:

1. Engineering Project

Title: Cloud Based Smart City Complaint Registration And Management

Technology and tools: Android, JAVA

Description:

Smart compliant apps are introduced to provide users a platform to lodge a complaint easily. So smart complaints reduce people's efforts. Complain lodger can share location using GPS .This app deals with internal processing of compliant .The main purpose of this system is to help public in knowing their place details and getting their problem solved online without going to the office until the problem is solved

Roles and Responsibilities:

- Participated in collecting, analyzing, summarizing the needs and technical

requirements for completeness and correctness.

- Ensuring proper implementation, testing, debugging and verification of the system.

2. Diploma Project

Title: Text Pad++

Technology and tools: JAVA

Description:

Text Pad++ is a basic text editor that you can use to create simple documents. The most common use of Text Pad++ is to view or edit text files. It supports only very basic formatting, you cannot accidentally save special formatting in documents that need to remain pure text.

Roles and Responsibilities:

- Participated in collecting, analyzing, summarizing the needs and technical requirements for completeness and correctness.
- Ensuring proper implementation, testing, debugging and verification of the system.
