MANAGEMENT PANEL

Manager Profile

A section dedicated to managers to add & manage the school's records and details with ease.

Quick Access

Get a quick access action to student details, fees management, attendances, exam group & results, timetables, and other inquiries.

Front Office

Streamline front-office operations and visitor management. You can check the staff calendar, validate security by OTP or biometric, generate identity tag, generate pickup pass for a child, and monitor exit timeline.

Student Information

Store student's data and analyze performance trends to bring more transparency to the functioning of the school. A complete record of students like consolidated personal and academic reports provide a 360-degree view of the complete student profile.

Fees Collection

Simplify fee management with a secure payment gateway and view all transaction details. Parents can pay the fee online from home, get receipts instantly by email, and in-app. Money is automatically allocated to the correct receipt head. No waiting, no lines, no data mismatch.

Finances: Income & Expenses

A feature to handle all the expenses & income of the school for proper calculation of finances & transactions throughout the system.

Attendance

Attendance is taken instantly via RFID readers and updated instantly in the system and parent app. It helps maintain attendance records efficiently and gets rid of piles of paperwork. Teachers spend zero time taking attendance in class.

Examination

With the help of the app, pre-defined templates can be used and report cards can be generated with a single click. There is no need for any spreadsheets or offline work.

Online Examination

Online examinations & with a detailed record of question bank, and a module that configures the number of classes, subjects, language, and types of examinations.

Lesson Plan

A feature that has a lesson plan for the teacher's guide for running a particular lesson, which includes the goal (of what students are supposed to learn), how the goal will be achieved, and measuring how well the goal was achieved with the help of tests, worksheets, homework, etc.

Academics

A feature that reviews data about academic program performance. This will also scan the external environment to determine larger trends that will affect the institution's research and teaching activities.

Human Resources

This feature works on the complete human resources operations in the school, from the time candidates & teachers apply for a job till the time they resign. It includes staffing, recruiting, and training.

Communicate

You can now take better control of all internal and external communication. Late fee reminders will be automatically sent via email and app notification. If not read in 4 hours, the app will automatically send an SMS to the parents. Increase parent engagement with chat and group communication.

Download center

Download center is a feature that allows you to download & store content related to students, faculty & authorities, bills, contracts, other essentials in the school systems.

Homework

An amazing feature that allows posting of homework/assignment details online to the students who can see their homework for reference.

Library

You can now manage your library catalog and issue books online. Effortlessly integrate your library module with barcode systems. Maintain a detailed and easily accessible list of library books. Reduce errors due to manual verification and registration of books.

Reports

The Report feature is one of the biggest features in this whole module. This feature allows the collection & storage of the reports related to transactions, appointments, students, authorities, library, examinations, etc.
