Product description

Nitrile gloves are made with synthetic rubber that surpasses latex in every way: Higher puncture resistance Higher chemical/ liquid/ gas protection Heavy duty strength Higher tactile sensitivity without sacrificing any of the above And the best part is that they can be used by both men and women, righties or lefties (ambidextrous design) as well as people with sensitive to latex or donning powder skin (non-allergenic material). Nitrile is the most-recommended disposable glove material, with excellent resistance to chemicals and punctures. It provides a comfortable fit, high dexterity and tactile sensitivity, and it will not aggravate latex allergies.
