SDLC Proficiency: Waterfall & Agile

Prepare Proposals & Contracts for client

Detailed FRS & BRD Creation.

Wireframing & Prototyping Skills.

Effective User Stories & Criteria

Requirement Techniques Expert

UML & OOA Proficiency

Functional Point Analysis

Client Management

CERTIFICATES:

- **IT Business Analysis from COEPD (An Endorsed Education Provider for IIBA)**

WORK EXPERIENCE

Project 1: Delivery Management Software (Senior Business Analyst)

Role and Responsibilities: In my role as a Business Analyst for the Delivery Management Software project,

I contributed significantly by

- Collaborating with clients to gather comprehensive requirements and meticulously analyzing them to ensure accurate understanding.
- Assessing the Scope of Work provided by clients to create estimates and timelines that effectively align with project cost considerations.
- Engaging in the creation of wireframes and mock-ups, providing a tangible visualization of the system's layout and functionality.
- Playing a key role in addressing challenges by conducting thorough research and analysis, while also adhering to tight time constraints.
- Demonstrating the product/application to clients, showcasing its features and capabilities through effective presentations.
- Ensuring effective communication with stakeholders to ensure all concerns are addressed and resolved promptly and accurately.

WORKSHOP:

- Undergone workshop at COEPD for business analyst
- Prepared functional requirement document
- Prepared UML diagram such as use case diagram, activity diagram, and sequence diagram to communicate business requirement
- Prepared flowchart diagrams (TO-BR, AS-IS) and cross-functional diagrams using MS Visio.

Technical Skills:

- **Operating Systems:** Windows 7, 8.1 10 & 11 pro
- **Documentation Tools:** MS Office, Google Suite
- **Design Tools:** Figma, MS Visio & Draw.io.
- **Prototyping Tools:** Axure RP, Balsamiq.
- **Analytical Tools:** Jira, Tableau.
- **Language:** Basic knowledge of SQL.

Project 2: Abay Logistics (Transport Management Software)

Role and Responsibilities: During my tenure on the Abay Logistics project, I played a pivotal role in the following capacities:

- Created a comprehensive feature list with modules, providing a structured framework for the software's development and functionalities.
- Assessed the Scope of Work shared by clients, effectively formulating accurate estimates and project timelines for cost assessment.
- Applied logical reasoning to each functionality, imparting knowledge and guidance to developers to ensure the software's accuracy and robustness.
- Actively engaged in client management, ensuring a seamless communication channel and addressing their needs promptly.
- Generated Security Documentation to guarantee the integrity and safety of the developed software.
- Constructed a System Architecture diagram using Draw.io, offering a visual representation of the software's structure and components.
- Conducted thorough manual testing of the software to ensure its functionality and reliability met the highest standards.
- Managed and guided the project team, providing them with valuable insights and knowledge transfer to maintain the software's seamless flow.
- Utilized in-depth research and analysis to address and resolve concerns efficiently, even within tight time constraints.
- Applied logical reasoning to each functionality, imparting knowledge and guidance to developers to ensure the software's accuracy and robustness.

Project 3: On-Premises (CA Firm Software)

Role and Responsibilities

- Engaged in analyzing and extracting information from a 198-page PDF requirement document.
- Acquired insights into the organization's workflow, specifically focusing on the automated task assignment process to employees, and subsequently incorporated these functionalities into the proprietary in-house Wi-Fi attendance software.
- Provided instrumental assistance to the team by conducting thorough research and analysis, addressing concerns within specified time constraints.
- Produced descriptive flowcharts using MS Visio to illustrate the operational processes and enhance understanding.
- Generated concise documentation outlining the project requirements and solutions.
- Evaluated the Scope of Work provided by clients, facilitating the creation of accurate project estimates and timelines for cost assessment.
- Crafted UI designs on the Figma platform to visualize and refine the user interface components.

Project 4: Love Your Work (Recruiting Software)

Role and Responsibilities: As a key participant in the Love Your Work project, I effectively contributed to the following activities:

- Crafted concise and effective User Stories that encapsulated the essential requirements of the project, enhancing the clarity of communication between stakeholders and the development team.
- Developed comprehensive flowcharts to visually represent the proposed processes and workflows, facilitating a clearer understanding for the client.
- Created mockup screens utilizing Balsamiq, enabling stakeholders to visualize the user interface and design of the web application.
